Skills

- **Networking:** Cisco, TCP/IP, VPN, addressing, segmentation
- **Systems:** Linux, Windows, Docker, Git, SQL, Centreon
- **Cybersecurity:** Stormshield, Fortinet, Metasploit
- **Scripting and automation:** Bash, Python, PowerShell
- **Web:** HTML, CSS, JavaScript, PHP, Node.js

Languages

English

C1

Able to communicate with native speakers and use technical vocabulary.

Strengths

- Logical mindset
- Self-taught
- Persistent
- Team spirit

Interests

- Volleyball, running, strength training
- Pentesting and CTF challenges on TryHackMe
- Tooling and automation

Computer engineering student with a background in networks and telecommunications, focused on infrastructure, systems and cybersecurity. I am looking for environments where I can combine technical rigor, automation and information system security.

Professional Experience

Industrial IT apprentice

Since 2023

Euroapi

Operational maintenance, security maintenance, project management and contribution to network infrastructure topics in an industrial environment.

Academic tutoring

2023

Cordée de la réussite, student support, private tutoring

Support for students, technical popularization, methodological guidance and personalized follow-up.

Agricultural worker and seasonal jobs

2019 – 2022

Beauregard-l'Évêque (63)

Corn detasseling, agricultural assistance, waste collection and participation in on-site team organization.

Work experience internship

2019

3D Systems – Riom (63)

Discovery of a corporate IT department and first immersion in a professional technical environment.

Education

Apprenticeship engineering degree in computer science

2022 – 2025

ISIMA apprenticeship engineering program – Aubière (63)

General computer engineering program: software development, project management, communication and systems.

University Bachelor of Technology in Networks and Telecommunications

2022 – 2025

IUT Networks and Telecommunications – Aubière (63)

Program focused on networking, systems, telecommunications and cybersecurity.

French general baccalaureate

2019 – 2022

Lycée Pierre Joël Bonté – Riom (63)

Honors. Majors: mathematics, engineering sciences. Electives: advanced mathematics, climbing.

Projects

Design of an industrial network solution

Apprenticeship

Main project at Euroapi

Project management, analysis of the existing environment, needs assessment, project structuring, supplier coordination, network design and monitoring.

Capture The Flag

Since 2022

TryHackMe

Continuous learning in pentesting, exploitation, enumeration, cryptography and offensive methodology through hands-on training environments.

Honeypot

2026

Personal project

Creation of a honeypot with graphical analysis of results using Cowrie, Grafana, Prometheus and GeoIP.

Ankaria

May – September 2020

Minecraft server project

Contributed to the project's development, discovered Java and gained a first concrete team-based experience on a digital product.
